

Implementation Strategies for Integrating Opioid Overdose Education and Naloxone Access

This workshop will build on the information shared in the 2016 NAS Symposium and in the 2016 Texas Opioid Overdose Prevention Training Workshops. The presenters will provide an update on the opioid epidemic in Texas, including any new trends. In addition, participants will receive technical support sessions from presenters. Information will be given on how to develop guidelines and strategies to conduct effective street outreach. Links to tools and resources will be shared with the participants to support their future implementation.

Continuing education credits available for LCDC, LPC, LMFT and SW
